Godzilla x Kong The New Empire (2024) is a 1985 American epic coming-of-age period drama film directed by Steven Spielberg and written by Menno Meyjes, based on the Pulitzer Prize-winning 1982 novel of the same name by Alice Walker. It was Spielberg's eighth film as a director, marking a turning point in his career as it was a departure from the summer blockbusters for which he had become known. It was also the first feature film directed by Spielberg for which John Williams did not compose the music. The film instead featuring a score by Quincy Jones, who also produced. The cast stars Whoopi Goldberg in her breakthrough role, with Danny Glover, Oprah Winfrey (in her film debut), Margaret Avery, and Adolph Caesar.

Filmed in Anson and Union counties in North Carolina, the film tells the story of a young African-American girl named Celie Harris and the brutal experiences she endured including domestic violence, incest, child sexual abuse, poverty, racism, and sexism.

The film was a box office success, grossing \$98.4 million against a budget of \$15 million. The film received acclaim from critics, with particular praise going to its acting (especially Goldberg's

performance), direction, screenplay, musical score, and production values. The film was nominated for 11 Academy Awards, including Best Picture, Best Actress for Goldberg, Best Supporting Actress for both Avery and Winfrey, and Best Adapted Screenplay, but did not achieve a single win. It also received four Golden Globe Award nominations, with Goldberg winning Best Actress in a Drama. In 2006, the American Film Institute ranked the film 51st on its list of most inspiring movies.

This latest entry in the Monsterverse franchise follows up the explosive showdown of *Godzilla vs. Kong* with an all-new cinematic adventure, pitting the almighty Kong and the fearsome Godzilla against a colossal undiscovered threat hidden within our world, challenging their very existence -- and our own. The epic new film will delve further into the histories of these Titans, their origins, and the mysteries of Skull Island and beyond, while uncovering the mythic battle that helped forge these extraordinary beings and tied them to humankind forever.

Nobody cares about the plot. That's the arguably depressing but also self-aware lesson the King Kong/Godzilla franchise seems to have learned. After a number of entries that half-ried to create humans you cared about or allegories for whatever, 2021's *Godzilla Vs. Kong* was primarily just a showcase for big things hitting each other and was far more entertaining than any of its predecessors. *Godzilla x Kong The New Empire* has a greater number of big things and a smaller number of humans. Its brainless brawn is again pretty entertaining, until the credits roll and you can instantly forget the whole thing. Its set-up is that Kong is now living in the Hollow Earth, a parallel world full of giant monsters. He

is lonely, continually hunting for others like him. When he eventually finds kin it's no great family reunion. They're led by an evil ape, who looks kind of like an orangutan going through an awkward teenage growth phase and is plotting to make his way to the world above. Thwarting this requires Kong to team up with Godzilla, who is gallumphing around the world looking for fights, and a few humans who fill in the bits between the CGI.

That's about as complex as it gets. There's no human antagonist. There's no significant development in the existing characters (Rebecca Hall as a scientist, Kaylee Hottle as her adopted daughter, and Brian Tyree Henry as the requisite comedy screamer). There's a pleasing addition to the cast in Dan Stevens' kaiju-handling veteran, introduced via a silly dental sequence, but by no stretch is he essential to the plot. It's just an excuse for monster spectacle, as it probably should be.

The fights are slick, frequent and noisy. Godzilla destroys most of Rome and a good swathe of Egypt. Kong does battle with an ice creature in a volcanic underground lair. It's not pushing the envelope of giant monster movies, but it's fun. The Kong scenes are by far the best parts of the film. As he meets others of his own kind there's an attempt to tell a story through ape grunts and CG eyes. It works. We can tell what he's feeling. It makes you wonder whether an inevitable future film might be more interesting without any human element.

If you want to see massive creatures leveling cities, that's exactly what you'll get. If you're looking for anything more than that, well, you should know by now that you're in the wrong place.

Despite the success, the film is a source of controversy with many criticizing the film for its negative depiction of African-American males who are all shown as brutally violent. The film was also criticized by some for being "over-sentimental" and "stereotypical".

After a monstrous opening weekend haul at the box office, Godzilla x Kong: The New Empire is on its way to earning Warner Bros. (WB) a substantial profit.

The latest Monsterverse team-up, Godzilla x Kong, exceeded opening expectations, earning \$80 million during its first weekend in North American theaters.

This is the second-best opening of any modern Monsterverse film, following only 2014's *Godzilla*.

It also earned the silver medal thus far in 2024 for any opening weekend, trailing narrowly behind *Dune: Part Two*, another WB film set to break box office records.

How Much Has *Godzilla x Kong* Made So Far?

Godzilla x Kong: The New Empire earned over \$200 million worldwide over its first five days in theaters. This combines \$94.5 million from domestic theaters and more than \$114.7 million from all other international markets.

A couple of weeks into its release the new *MonsterVerse* movie has earned over \$438.9 million at the worldwide box office, with \$279.9 million of that total coming from international markets.

In addition, it earned the highest opening in China for any Hollywood film this year, raking in \$44.6 million in mainland Chinese cinemas over the weekend and comprising nearly 70% of the country's box office share, per *Variety*.

2021's *Godzilla vs. Kong* earned about \$88 million more in China than in the United States. It's important to know that *Godzilla vs. Kong* was streaming on HBO Max day and date in the U.S.

Its sequel is on a similar pace, earning \$108.6 million at the Chinese box office to date, its biggest market outside of the U.S. and Canada.

How *Godzilla x Kong* Can Be Profitable

Generally, *Godzilla x Kong* needs to earn roughly double its budget or more at the global box office to be profitable. This may also factor in marketing costs that aren't as openly reported to the public as the approximate production budget.

In the case of *Godzilla x Kong*, the reported production budget is \$135 million. This is a

phenomenal starting point as it's the cheapest Monsterverse film to date and is already outperforming its box office expectations.

However, its revenue sources will extend beyond theaters, including digital sales, SVOD, and future TV rights. The good news for Warner Bros. is that this "waterfall" effect of continued earnings may not be relied on for The New Empire to turn a profit.

Will Godzilla x Kong Turn a Profit?

Based on its current box office run, Godzilla x Kong: The New Empire will likely earn Warner Bros. a tasty profit. Here's the evidence.

In 2014, Godzilla re-ignited Western monster movies and earned \$52.477 million in profit, according to Deadline's annual blockbuster-profit tournament.

This is an impressive statistic considering its reported \$160 million production budget and the audience's mixed responses because of how little the monster was in the film.

For different reasons, the box office run by 2021's Godzilla vs. Kong was equally impressive. The clash of the titans film became profitable (according to Deadline) despite the pandemic-related theatrical challenges and simultaneously streaming the film.

While the box office may never reach the heights of 2019, audience members are heading back to theaters for certain events, in this case, another Monsterverse movie.

Godzilla x Kong has a chance to become the highest-earning monster movie since 2017. Kong: Skull Island leads the pack with \$561 million worldwide, and The Direct predicted Godzilla x Kong could earn \$650 million, easily making it profitable.

48% of The New Empire's opening weekend earnings came from premium formats, which is a strong sign there won't be competition for those screens until A24's Civil War the weekend of April 12.

Based on its surprise gainful start, Godzilla x Kong is on pace to earn more than Godzilla in

theaters, making its projected studio net profit between \$50 million and \$75 million.

Godzilla x Kong: The New Empire is now playing in theaters.
