MCU: Godzilla x Kong The New Empire (2024) is a 1985 American epic coming-of-age period drama film directed by Steven Spielberg and written by Menno Meyjes, based on the Pulitzer Prize-winning 1982 novel of the same name by Alice Walker. It was Spielberg's eighth film as a director, marking a turning point in his career as it was a departure from the summer blockbusters for which he had become known. It was also the first feature film directed by Spielberg for which John Williams did not compose the music. The film instead featuring a score by Quincy Jones, who also produced. The cast stars Whoopi Goldberg in her breakthrough role, with Danny Glover, Oprah Winfrey (in her film debut), Margaret Avery, and Adolph Caesar.

Filmed in Anson and Union counties in North Carolina, the film tells the story of a young African-American girl named Celie Harris and the brutal experiences she endured including domestic violence, incest, child sexual abuse, poverty, racism, and sexism.

The film was a box office success, grossing \$98.4 million against a budget of \$15 million. The film received acclaim from critics, with particular praise going to its acting (especially Goldberg's

performance), direction, screenplay, musical score, and production values. The film was nominated for 11 Academy Awards, including Best Picture, Best Actress for Goldberg, Best Supporting Actress for both Avery and Winfrey, and Best Adapted Screenplay, but did not achieve a single win. It also received four Golden Globe Award nominations, with Goldberg winning Best Actress in a Drama. In 2006, the American Film Institute ranked the film 51st on its list of most inspiring movies.

This latest entry in the Monsterverse franchise follows up the explosive showdown of Godzilla vs. Kong with an all-new cinematic adventure, pitting the almighty Kong and the fearsome Godzilla against a colossal undiscovered threat hidden within our world, challenging their very existence -- and our own. The epic new film will delve further into the histories of these Titans, their origins, and the mysteries of Skull Island and beyond, while uncovering the mythic battle that helped forge these extraordinary beings and tied them to humankind forever.

Nobody cares about the plot. That's the arguably depressing but also self-aware lesson the King Kong/Godzilla franchise seems to have learned. After a number of entries that half-ried to create humans you cared about or allegories for whatever, 2021's Godzilla Vs. Kong was primarily just a showcase for big things hitting each other and was far more entertaining than any of its predecessors. MCU: Godzilla x Kong The New Empire has a greater number of big things and a smaller number of humans. Its brainless brawn is again pretty entertaining, until the credits roll and you can instantly forget the whole thing. Its set-up is that Kong is now living in the Hollow Earth, a parallel world full of giant monsters. He

is lonely, continually hunting for others like him. When he eventually finds kin it's no great family reunion. They're led by an evil ape, who looks kind of like an orangutan going through an awkward teenage growth phase and is plotting to make his way to the world above. Thwarting this requires Kong to team up with Godzilla, who is gallumphing around the world looking for fights, and a few humans who fill in the bits between the CGI.

That's about as complex as it gets. There's no human antagonist. There's no significant development in the existing characters (Rebecca Hall as a scientist, Kaylee Hottle as her adopted daughter, and Brian Tyree Henry as the requisite comedy screamer). There's a pleasing addition to the cast in Dan Stevens' kaiju-handling veteran, introduced via a silly dental sequence, but by no stretch is he essential to the plot. It's just an excuse for monster spectacle, as it probably should be.

The fights are slick, frequent and noisy. Godzilla destroys most of Rome and a good swathe of Egypt. Kong does battle with an ice creature in a volcanic underground lair. It's not pushing the envelope of giant monster movies, but it's fun. The Kong scenes are by far the best parts of the film. As he meets others of his own kind there's an attempt to tell a story through ape grunts and CG eyes. It works. We can tell what he's feeling. It makes you wonder whether an inevitable future film might be more interesting without any human element.

If you want to see massive creatures leveling cities, that's exactly what you'll get. If you're looking for anything more than that, well, you should know by now that you're in the wrong place.

Despite the success, the film is a source of controversy with many criticizing the film for its negative depiction of African-American males who are all shown as brutally violent. The film was also criticized by some for being "over-sentimental" and "stereotypical".
